

IADC RigPass Course

The IADC RigPass Course is a globally recognised safety orientation program developed for personnel working in oil and gas drilling environments. The program prepares new employees to safely work in onshore and offshore drilling operations by providing essential knowledge of rig operations, workplace hazards, and safe work practices.

Completion of the course confirms that personnel have met the fundamental safety orientation requirements defined by industry safety and training professionals.

Course Syllabus

The RigPass® training curriculum includes (but is not limited to):

- General Safety Principles & Workplace Culture
- Personal Protective Equipment (PPE)
- Hazard Communication & Risk Awareness
- Occupational Health & Emergency Response
- Environmental Protection & Fire Safety
- Rig/Platform Orientation and Life on Site
- Onshore & Offshore Operational Awareness
- Basic Worksite Safety Practices

**Training
Methodology**

**Classroom
training**

**Interactive/Virtual
learning activities**

Duration

| Type | Training Time | Training Duration |
|---------------------|---------------|------------------------------------|
| Classroom / Virtual | Full Day | 2 Days (Onshore & Offshore Topics) |

Course Assessment

| Assessment Type | Method |
|----------------------|-----------------------|
| Knowledge Assessment | Written / Online Test |

Participants who successfully complete the assessment will receive an IADC RigPass Certificate of Completion.

Prerequisites

- No formal prerequisites required
- Suitable for individuals working in or planning to pursue a career in the oil and gas industry.

Training Methodology

- Classroom training sessions
- Interactive/Virtual learning activities

Target Audience

- Personnel entering the oil and gas industry
- Rig crew and drilling personnel
- Contractors and service company employees
- Engineers, technicians, and field workers
- Offshore and onshore oil & gas personnel

Course Benefits

- Provides standardized safety orientation for drilling operations
- Improves safety awareness in oil and gas environments
- Helps organisations comply with industry safety standards
- Reduces workplace incidents and operational risks
- Recognised globally in oil & gas drilling operations
