

IOSH Working Safely

IOSH Working Safely is a one-day certification course with a core focus on health and safety. The curriculum will give learners an outlook on risk assessment, identification of common hazards, how to improve safety performance, and protect the environment. These are some of the working safely traits expected by industries from their workforce. Therefore, aspirants irrespective of industries and their position have the opportunity to get certified in this course to contribute more towards working safely. The fine aspect of this course is that it would give an impetus to the HSE career to reach greater heights.

Course Syllabus

- Module 1: Introducing working safely
- Module 2: Defining hazard and risk
- Module 3: Identifying common hazards
- Module 4: Improving safety performance
