

# ISEP Environmental Sustainability Skills for Managers

*Grow Managerial Confidence.*

*Enhance Team Performance.*

*Advance Sustainable Progress.*

## About ISEP

UK's leading environmental and sustainability body, the Institute of Sustainability and Environmental Professionals (ISEP), is the global membership organisation for individuals committed to driving sustainable change across government, business and society. ISEP sets the benchmark for sustainable leadership, skills, knowledge and professional practice to empower environmental specialists, sustainability generalists and emerging changemakers through evidence-led insights, world-class training and robust professional standards.

## Course Overview

This two-day course equips managers and supervisors across industries with a strategic and operational understanding of environmental sustainability, enabling them to strengthen organizational performance, drive measurable improvements, and manage operational objectives. Building on core environmental knowledge, this course provides participants with practical tools, frameworks, and real-world insights to turn sustainability principles into measurable outcomes. To actively contribute to sustainability initiatives and boost organizational performance, the course emphasizes the importance of resource efficiency, the value-chain impacts, and the role of pollution prevention, control, and environmental legislation.

## Target Audience

- Supervisors and managers across all sectors
- Team leaders and managers responsible for overseeing organisational improvements
- Individuals who wish to develop environmental sustainability skills

## Prerequisites

- None. There are no formal entry requirements

## Learning Outcomes

Upon successful completion of the course, learners will have the:

- Knowledge and understanding of the main environmental and economic risks/opportunities.
- Awareness on compliance obligations and business drivers for change.
- Expertise on the main potential impacts on environment and sustainability.
- Understanding of how to improve environmental performance.

- Ability to evaluate the drivers for change and the barriers to environmental sustainability.
- Ability to apply knowledge and understanding to baseline data in order to monitor and improve environmental performance.
- Ability to apply environmental sustainability knowledge across the organisational value chain.
- Understanding of resource efficiency implementation within organisations.
- Understanding of how employees can contribute to improving environmental performance.

### Training Methodology

- Virtual delivery

### Duration

- 2 Days

### Course Assessment

- Online 20-question multiple-choice test
- A minimum score of 70% is required to pass
- Assessment is completed through the ISEP assessment portal, and candidates receive an access link upon registration
