

# NEBOSH HSE Certificate in Health and Safety Leadership Excellence —

Embark on a transformative health and safety leadership journey by pursuing the NEBOSH HSE Certificate in Health and Safety Leadership Excellence. This globally respected qualification is designed to meet modern employer expectations by strengthening leadership capability at all levels and embedding a positive safety culture. Ideal for managers, supervisors, directors, and aspiring leaders, the course goes beyond technical knowledge to develop the mindset, behaviours, and influence required to lead health and safety with confidence and impact.

## Course Syllabus —

### Unit HSL1: Health and Safety Leadership

- Element 1: The Foundations of Health and Safety Leadership
- Element 2: Human Failure and Decision-Making
- Element 3: Leadership

## Prerequisites —

- There are no formal entry requirements to undertake this course. However, achievement of the NEBOSH International General Certificate in Occupational Health and Safety (IGC) (or equivalent) will be an added value.
- A minimum standard of English proficiency is required.

Training  
Methodology

Virtual

Face to Face

## Duration —

- 2 days including Pre-Course Discussion, Face-to-Face Instructor-Led Classroom Session & Assessment

## Course Assessment —

You will be assessed based on the Reflective statements completed during the course on the HSE's five leadership values. The values are:

- building and promoting a shared H&S vision;
- being considerate and responsive;
- providing support and recognition;
- promoting fairness and trust in relationships with others; and
- encouraging improvement, innovation and learning.

Additionally, delegates must commit to make a single leadership intervention for improving health and safety management within their organisation.

## Target Audience —

- Senior business leaders or those aspiring to this position
- Directors
- Board members
- Business owners
- Chief executives
- Senior managers
- Heads of departments

## Course Benefits —

- Includes interactive content that influences effective decision-making and positive safety behaviours
- Focuses on productivity, improvement, risk management, and competitive advantage
- Explains the impact of leadership behaviour on health and safety performance
- Addresses risk-taking behaviours aligned with HSE's "Make it happen" model
- Covers moral, legal, and financial drivers of strong safety leadership
- Introduces key leadership styles to improve employee engagement and safety culture

## Further Progression —
